PROFILE

Data Engineer with a total of 6 years of IT experience and 3 years of relevant experience in building large-scale data pipelines, ETL processes. Utilized technologies like **Python, SQL, Spark, Databricks** to develop big data solutions. Looking for suitable positions to develop and broaden my competence, business experience, and analytical skills as a data engineer.

TECHNICAL SKILLS

Programming Languages: Python, SQL
Big Data Technologies: Spark, PySpark, Spark SQL
Cloud Platform: Databricks, ADF, ADLS, Amazon S3

EXPERIENCE

Tredence Analytics Nov 2024 - Apr 2025
Senior Data Engineer Kolkata, India

- Implemented Databricks notebooks and workflows mimicking DataStage Jobs, ingesting data from multiple sources and loading it in ADLS.
- Co-ordinated with platform team to implement Databricks Asset Bundles (DAB) for deployment.
- Optimized golden layer through effective data modeling by consolidating redundant tables and providing a better analytical view on stored data
- Assisted team members in building and testing dashboards in Power BI from materialized views present in the Golden layer

Cognizant Technology Solutions Nov 2022 - Sep 2024
Associate Kolkata, India

- Responsible for building pipelines for ingesting real-time kafka data from multiple streams to azure blob and implementing transformation logics using Azure Data Factory and Databricks notebooks.
- Worked on data transformations which enriched the business ready data with multiple parameters.
- Analysed and optimized different processes which resulted in better data monitoring and data governance.
- Assisted the team to prepare necessary reports, and collaborated with different leads and client POC during product cycles.

Cognizant Technology Solutions March 2019 - Oct 2022
Programmer Analyst Chennai, India

- Involved in MDM implementation team who worked with customer and product data cleansing using STIBO MDM tool.
- Analyzed de-duplication and merging rules in MDM tool so clients can have business ready data.
- Accountable for automating scripts using PyTest, Selenium, root cause analysis, making defect report and communicating with team members until successful closure.
